

# 8x20 New Yorker

Call Toll-Free: (866) 297-3760

The New Yorker design was derived from our Vermonter design. Like the Vermonter, this building is your basic outdoor storage shed. The 5 ft. double doors have been moved to the bearing wall and the overall height has been raised to allow for this change. The shed is perfect to fit your storage needs and cure the over flowing garage.

This outbuilding's 5'0" double doors are large enough to fit a riding lawn mower, ATV, or a couple motorcycles. The versatile shed has been used in many ways from general storage to a play house or turned into a great little potting shed tucked away by the garden.

No Plywood is used in the New Yorker. It is built the same way they have been for centuries with native Vermont Lumber. Available in Option A with the double doors on the 20' bearing wall and in Option B with the double doors on the 8' gable end.

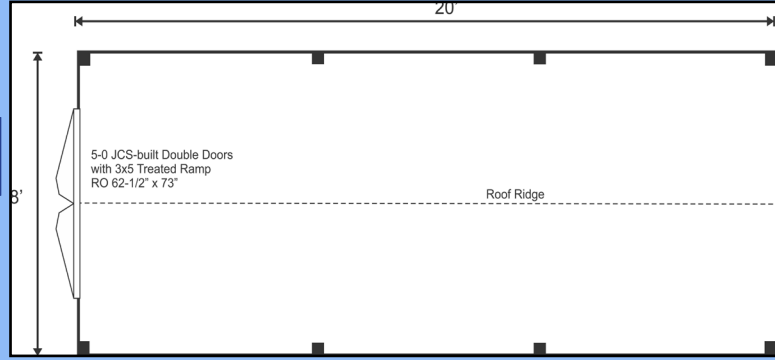

- Included with Kit:**
  - \*Step-by-Step Instructions
  - \*All Fastening Hardware

### Specifications:

- Square Footage:** 160 sq/ft
- Overall Dimensions:** 10' 6" H x 8' 8" W x 20' 8" L

### Plans \$50

Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

### Complete Kit \$4,835

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner knowledge of carpentry.
