

12x20 Saltbox

Call toll-free: 1.866.297.3760

By far the most popular design, the salt box begs the word traditional. This extremely versatile cottage has a very rugged Hemlock frame that will withstand the test of time. With 240 square feet of usable space, this building easily lends itself to basic storage, a potting shed or parking for your outdoor toys.

The salt box design originated in New England shortly after the pilgrims landed. The design most likely originated from a shed roof style. An overhang off the front was added for protection and style. It has proved to be a very aesthetically pleasing and practical design for snow country. Many rural farms can be spotted with homes and out buildings with roofs that shed the majority of snow off the back and out of the way.

All of our wood sheds, storage sheds, garden sheds, cottages and utility enclosures are built of the finest Vermont lumber and handcrafted for long life and durability. New England weather can really put a wood garden shed or cottage to the test, and Jamaica Cottage Shop's products have proven to stand the test of time and strength.

Plans \$50

Complete Kit \$7,385

Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. It includes a cut and notched hemlock post and beam frame and pre cut pine siding. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner knowledge of carpentry.
