

# 6x14 Vermont Gem

Call toll-free: 1.866.297.3760

This Cottage Shop creation was designed in response to the numerous requests for a practical and pleasing building for the purpose of fire wood storage and garbage/recyclable containment. Very well proportioned, the little Vermont gem is featured with a gable overhang and a full partition between the wood storage and the garbage section. There is room enough for a full stacked cord of wood and two large garbage cans.

Hand made in Vermont, from native rough sawn hemlock and pine lumber, this cottage is delivered fully assembled to your prepared site. Rugged post and beam techniques, passed down through the centuries, are used to construct this sturdy picturesque retreat, reminiscent of old New England. Have your own Vermont cabin in the woods!

All of our wood sheds, storage sheds, outdoor storage sheds, garden sheds, storage shed kits, cottages and utility enclosures are built of the finest Vermont lumber and hand-crafted for long life and durability. New England weather can really put a wood garden shed or cottage to the test, and Jamaica Cottage Shop's products have proven to stand the test of time and strength.
